

Kusum Lamichhane

I am an enthusiastic person committed to working in a computing profession. By continually enhancing my knowledge and skills I seek to provide the best quality service and always be ready to learn new things. I would gain considerable satisfaction if I would be able to work within the ethical code of any organization.

Currently in the final semester.

VS Niketan, Tinkune — +2

Percentage secured: 75%

(Major in Biology)

Bal Geetanjali English School, Mulpani — S.L.C

Percentage secured: 86%

PROJECTS

Employee Management System — Dotnet, jQuery, Identity

A role based application, where employees can do stuff like ask for leave, turn in and turn out. And the admin can grant/reject leave, view reports, etc. I used dotnet MVC with jQuery for this project.

Github : <https://github.com/lamichhanekusum01/EmployeeManagementIntern>

Clinic Management System — Dotnet, React

A role-based application, where patients can book appointments with doctors from the time provided by doctors. I was heavily involved in the backend part of this project, where I learned to work with Restful APIs.
